A GLOBAL CAUSE

GOVERNMENT PARTNERS AND HOSTED PAVILIONS

The Government Partnership and Hosted Pavilion programme provides countries with a dedicated platform to

showcase national mining priorities, investment opportunities, strategic projects and leading domestic companies to a global audience of investors, operators and policymakers.

Hosted Pavilions create a highly visible national presence on the exhibition floor, enabling governments and industry champions to promote their country's capabilities, strengthen bilateral relationships and facilitate direct engagement with global mining, processing, infrastructure and financing stakeholders.

The programme also supports broader economic diplomacy objectives by positioning participating nations as strategic partners within the evolving global minerals and energy transition ecosystem, while creating opportunities to attract capital, technology, downstream investment and long-term international partnerships.
